SUMMARY

Passionate Game Developer experienced in Unity (C#) and full-cycle game development from concept to published prototype. Adept at core mechanics programming, pipeline integration, and building polished, user-centric interactive applications.

WORK EXPERIENCE

Monobyte Games (Own Indie Studio)

May 2021 - Present

- Game Design** : Designed core mechanics and gameplay systems for Silent Reverie , Nobody Knows What Happened, and unreleased prototypes.
- Visual Design**: Created all end-to-end game assets, character models, and level environments solo.
- Audio Engineering** : Built audio systems, composed original soundtracks, and produced sound effects for all Monobyte Games projects.
- Marketing** : Launched and managed official social media campaigns (TikTok) to promote Monobyte Games titles.

Naga Plus Interactive

April 2026 - Present

- Game Design** : Design core game mechanics, dynamics, and level layouts for high-profile client projects operating under non-disclosure agreements (NDAs).
- Narrative Development** : Co-develop gameplay narratives and storylines in direct partnership with senior lead developers.
- Software Engineering** : Program gameplay systems across active projects, applying industry-standard design patterns and SOLID principles to write scalable code.
- Released Titles** : ZeeKwat Merge

EDUCATION

Bachelor of Information Science and Technology (Currently Pursuing)

November 2023 - Present

University of Technology (Yatanarpon Cyber City)

- Majoring in Information Science And Technology

ADDITIONAL INFORMATION

- Proactive Problem Solver** : Self-driven and eager to take ownership of complex mechanics from concept to polish.
- Team-Oriented & Collaborative** : Great at communicating across disciplines and co-developing features alongside senior leads.
- Reliable Under Pressure** : Accountable with a proven track record of hitting project milestones and tight deadlines.
